

LINEAR POTENTIOMETER

LZW Series

Key-Features:

- Two models with protection class IP65 and IP67
- Available measurement ranges from 50 to 750 mm
- Outputs: potentiometer, analog 0.5...4.5 V, 0...10 V
- Signal conditioner Squeezer: allows teaching of the measurement range and setting a switching point in combination with analog output
- Self-aligning rod end bearings
- Linearity up to $\pm 0.05\%$
- Working temperature $-30...+100\text{ }^{\circ}\text{C}$
- Life cycle $>25 \times 10^6\text{ m}$ or $>100 \times 10^6$ operations, whichever is less
- Simple apparatus according to the EN 60079-11 standard

LZW-M WITH ANALOG OUTPUT 4,5VT, 10VT, SQUEEZER

LZW-M sensors with the analog output versions 5VT and 10VT are equipped with a teachable, internal electronics, called VT-Electronics. The signals provided by the sensor's potentiometer are digitized by the VT-Electronics. This digital information is first processed by the electronics, then transformed back and given out as an analog output signal 0 to 10 V or 0.4 to 4.5 V.

The digitization offers two possibilities of adjustment, by which the sensor can be configured individually using the Squeezer:

- 1) Teaching of the measurement range. After a successful teaching process the Squeezer can be pulled off the sensor and be replaced by a standard cable or connector.
- 2) Setting an individual switching point. The Squeezer allows the setting of an individual switching point open collector. The switching signal is emitted through the Multi-functional line MFL.

You will find a detailed description of the functions in a separate manual.

TECHNICAL DRAWING SQUEEZER

Available cable lengths:
 Squeezer2M: cable length 2 m
 Squeezer5M: cable length 5 m
 Squeezer10M: cable length 10 m

ELECTRICAL CONNECTION SQUEEZER

In combination with LZW-M-...- 4,5VT / ...-10VT (analog output)

Connector (to sensor)		Cable ends (e.g. to PLC)	
Pin 1	V +	brown	V + (8...35 V)
Pin 2	Signal (cursor)	white	Signal
Pin 3	V - (GND)	blue	GND
Pin 4	MFL*	black	NPN**

* multifunctional line

** The Open Collector is a NPN switching output

ELECTRICAL CONNECTION

Installation instructions

- Please pay attention that the sensor is not used as a variable resistor.
- Please be careful while calibrating the sensor to set the stroke so that the output signal does not drop below 1 % or exceed 99 % of the supply voltage.

Output LZW-B (IP65)

Output LZW-M (IP65)

* MFL: connect only when using the functions of a Squeezer

Output LZW-IP (IP67)

SIGNAL CONDITIONER / CONTROLLER

PMX-24 Signal Conditioner

- Converts potentiometer signals into analog output signals
- Input: potentiometer 1...20 kΩ
- Configurable output
- DIN-rail-mounting with face-side connector
- For further information please contact WayCon or [download](#) the data sheet.

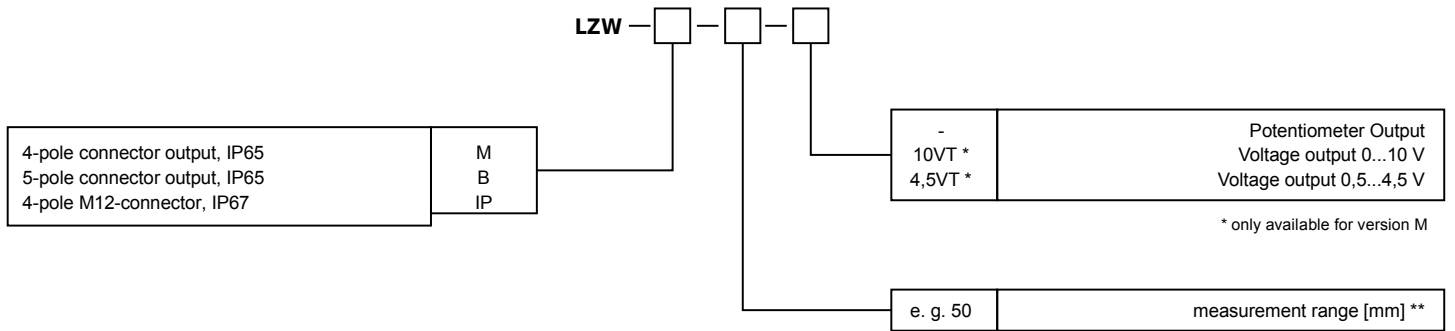

Squeezer Controller for LZW-M-...-4,5VT / ...-10VT

- Teachable measurement range
- Switching point open collector
